

Asheesh Sharma

Partner & Director of Data Warehousing and Business Intelligence (USA)

Asheesh never failed to make a tremendous impact on each client he worked with during his three-year tenure in ebusinessware. Asheesh has been successfully delivering software projects to the clients across the globe, ranging from entrepreneurial organizations to Fortune 500 companies.

He has rich experience in various client server, Web and data-management technologies, with specialization in Data Warehousing, Business intelligence, Data Mining, Data Integration, Sales CRM, and has played a major role in architecting, planning, developing and integrating various solutions in different heterogeneous enterprise environments.

Asheesh also specializes in various domains including Annuities, Payment gateway, Publishing and Logistics. He attributes his success to the basics of software development life cycle and religiously following UniRAD processes.

Due to his process-oriented approach, leadership qualities, domain expertise and strong analytical skills, he is currently advising leading financial institutions in United States.

At ebusinessware, Asheesh manages the Sales CRM, Data Warehousing and Business Intelligence practice comprising :

- Data Warehousing and Data Mining Practice
- Complex Data Integration Practice
- Business Intelligence Practice

His quiet and friendly nature coupled with a very positive attitude makes Asheesh a natural team leader who slips into the leading role effortlessly. Being a team player to the core, his excellent team management stories regularly do the rounds in ebusinessware corridors.

A Java professional, Asheesh's secret to success is thorough follow up and ensuring total completion of tasks, irrespective of the hour these may be required. At ebusinessware, Asheesh runs the Sales CRM practice implementing Epiphany as well as the open source-based proprietary CRM solution closely with Rajesh.

Asheesh's technical expertise and the quality of his character have made their mark on clients too, who have been unstinted in their praise for Asheesh. His technical depth provides his teams with a competency that he utilizes beyond challenges posed by his projects.

Asheesh uses his technical expertise to provide valuable assessment, resolution, and negotiation options throughout the challenging times in his projects and always acknowledges that accomplishments are team-based, not individual-based.
