

# Gaurav Malik

## Associate Partner

**PHOTOGRAPH TO BE  
ADDED HERE**

Recently joining the higher echelons of ebusinessware as a Partner & Director, Reference Data Practice (USA), Gaurav's success story began soon after his joining as a Software Engineer in the year 2003. Within a few months of joining, Gaurav was leading the offshore development team.

A Science graduate, Gaurav is also Sun Certified Java Programmer and a Microsoft-Certified Software Engineer, with nearly seven years experience in the IT sector.

Hardworking and committed, Gaurav designs, develops and implements application software with focus on providing solutions to minimize operational risks of the financial institutions. He is passionate about designing state of the art solutions to consolidate legacy databases while creating the centralized repositories for better reporting and interfacing with the heterogeneous external systems.

He has been developing workflow-based tools for analysis and treatment of counterparty data.

He is also instrumental in providing technology-based solutions to the ERM wing of a leading insurance company in the US. Some of his solutions helped this company to dramatically automate the process increasing the productivity.

Gaurav was a core team member that architected and developed ebusinessware's flag ship Product Tool Kit called CreditDimensions.

In ebusinessware's Wall Street office, Gaurav runs the practice for the development and integration of Reference Data Management suite and Reference Data Research and Maintenance. He is well supported by team members located at onsite and offshore (ebusinessware, India) and (London, UK). He divides his time at advising multiple large sized financial institutions in the area of credit risk data management technologies.

Gaurav's diversified technology knowledge is obvious from the fact that he has certification in software technology and system management along with the Sun Microsystems as well as Microsoft certification.
