"We help our clients to save money, enhance quality and lower the risk of IT projects."

OUR VALUE PROPOSITION

Our combination of in-depth industry expertise coupled with an ability to rapidly scale on and off-shore development, analyst and business processing teams on short notice helps our clients to get their projects done on time and within budget. Our technical professionals are experienced in a broad range of technologies ranging from legacy systems to cutting edge technology, enabling us to succeed in a wide variety of challenging assignments. Our business processing professionals are experienced in specific areas of data management and transaction processing, reducing learning curves and increasing productivity.

IMPLEMENTATION METHODOLOGY

ebusinessware technology architects have developed the UniRAD methodology framework for undertaking even the most complex collaborative project development assignments. UniRAD formalizes a quality management system practiced at the organizational level, such that progression of those best practices to all projects is natural, automatic and smooth for its workforce. UniRAD derives the best process components from the popular Rational Unified Process project methodology and the Rapid Application Development approach, providing a structured and delivery focused project approach.
